

Dear Parent

It's all natural and potentially effective...

.... Lice breakouts are headline news all over the world and especially now in South Africa – it's lice season and there's a national epidemic.

If you are battling with your child's lice infestation and have heard about yet another lice breakout, Picksan Lice Shampoo is exactly what you are looking for.

Picksan Lice Shampoo works quickly and effectively removes head lice with natural ingredients. It has been developed by Professor Dr. Heinz Mehlhorn and his team at Dusseldorf University, Germany, using the latest advances in natural plant extraction. Professor Mehlhorn is one of the world's leading experts on parasites and was recently in South Africa to share his insight on lice, their relationship with humans and to launch this new, non-toxic lice shampoo which has achieved widespread success in Europe.

Picksan Lice Shampoo has been tested by Vara Kassa, leading consumer testing organization in the Netherlands as well as by the Zoology Department at Cairo University and the Department of Community Health at the Federal University of Ceara, Fortaleza, Brazil - all with positive results. See here for these results  
<http://www.picksan.nl/Pages/Products/LinkluizenStopShampoo.aspx>.

In South Africa, head lice is common among children and this topic has recently made media headlines due to the serious and negative effects of certain toxic anti-lice shampoos currently on the South African Market. Professor Mehlhorn has proved this!

Picksan Lice Stop quickly and safely REMOVES head lice with natural plant ingredients and is:

- **Effective, quick and easy to use**
- **Gentle on the scalp and hair**
- **Makes combing easy**
- **Scientifically proven at Dusseldorf University**
- **Contains a specific and patented MelAza extract**
- **Very importantly: It is Dermatologically tested!**
- **It is SAFE for use by Children and Adults alike**
- **Its BENEFITS are instantaneous and enormous**
